Subject: PRES: Disaster Recovery Plan

The actions of the previous IT staff coupled with our current disaster has set us up for an even bigger disaster. To ensure our Board that we have things under control I want your team to create a Disaster Recovery Plan based on your current actions.

There are several things that you should include:

1. What measures are being taken to mitigate data loss (ie backup plans)
2. What steps are being taken to prevent our systems from being hacked again
3. What procedures should be implemented to recover data in the case of a security breach

I need this information presented to the Board in 1.5 hours. I need this presentation to be board ready as I do not have time to make edits so please focus on professional presentation.

Thank you.
