Subject: Management Reporting (Second Request)

As noted in my last request for a management report, the CISO is looking for a regular update. Please provide an updated version of the management report that includes:

- Major incidents

- Blocked attacks

- Security controls currently in place

Gather this data from the PA Logs, syslog as well as the events logs on the servers. The CISO is extremely paranoid and will repeatedly ask for an updated version of this report. Please describe any future security controls that you are also planning to implement to ease the CISO's worries. Be prepared to periodically submit this report at the CISO's request.

Thank you.

Director

Thank you.

Director
